

ANDROID RETAIL UPDATES

MDM Product Overview

TEAMSable's family of Android™ POS terminal, kiosks, and digital signage hardware now offers a free value-add service, Mobile Device Management (MDM). No matter the vertical, or TEAMSable Android™ hardware type deployed, our MDM application allows any organization to easily update all TEAMSable Android™ devices with a few simple clicks of a mouse, thus, saving time, resources and lowering the total cost of ownership (TCO) of any TEAMSable Android™ unit.

MDM Spotlight Features

- IT Departments can quickly push updates remotely to any TEAMSable Android™ terminal anywhere and at any time.
- Ability to update an organization's multiple TEAMSable Android™ terminals simultaneously.
- Manage and track app updates with detailed network reports.
- Save time by updating multiple system apps concurrently.
